

JULY 2024

Report from the Poland–Belarus border

Introduction

The following study is based on first-hand data obtained from persons involved in the described events. Our sources comprise organisations, informal initiatives, as well as individuals—the latter of whom often wish to remain anonymous, hence we do not mention them by name unless they have given us permission to do so. We owe special thanks to all those in transit who chose to share their own experiences with us.

Humanitarian workers and those who collaborate with them emphasise that the challenging context and ethics of their work often prevents them from obtaining more detailed information about the stories and circumstances of people on the move. During interventions, many such people are in such a severe psychophysical condition that it is not possible to obtain detailed information without risking retraumatisation or making them feel obligated to provide answers to humanitarian organisations simply because they have received support.

This time, we only present quantitative data regarding the reporting period.

For additional questions and suggestions from individuals or organisations who might be interested in receiving reports, please contact:
